

Decarbonising the Building Industry International Conference

MELBOURNE 19–20 NOVEMBER

MELBOURNE CONVENTION & EXHIBITION CENTRE

WWW.RNDBI.NET

SPONSORSHIP PACKAGES & OPPORTUNITIES

Hosted by DBI (Decarbonising the Building Industry Initiative)

The Decarbonising the Building Industry (DBI) initiative is a collaborative research and industry platform led by the University of Melbourne, bringing together researchers, industry leaders, policymakers and practitioners to accelerate pathways toward a low-carbon built environment.

DBI2026 is co-branded with the 12th International Conference on Innovative Production and Construction (IPC2026) and focuses on practical, scalable and evidence-based solutions for reducing emissions across the building lifecycle.

SPONSORSHIP PACKAGES & OPPORTUNITIES

Why get involved?

DBI2026 aims to showcase practical, scalable, and evidence-based solutions for decarbonising the building industry across construction, operation, and end-of-life.

Premium brand exposure

Increase your organisation's visibility among a targeted audience of researchers, industry leaders, policymakers, developers, consultants, and technology providers.

Build strategic connections

Connect with key decision-makers shaping the future of sustainable construction, low-carbon materials, digital technologies, and building decarbonisation.

Generate future opportunities

Develop new leads, partnerships, research collaborations, and business opportunities across academia, industry, and government.

Showcase your solutions

Present your organisation's products, services, technologies, and innovations through conference branding, sponsored activities, and dedicated booth opportunities.

Who will attend?

It is anticipated that delegates will attend DBI2026 in Melbourne from across academia, industry, government, and the built environment sector.

Representatives of the following sectors are anticipated to attend the international conference:

- Researchers and higher degree students
- Building and construction professionals
- Engineers, architects, designers, and sustainability consultants
- Asset owners, developers, and project managers
- Policymakers and government agencies
- Technology providers and solution developers

- Manufacturers and suppliers of low-carbon and reusable building materials
- Energy efficiency, renewable energy, and building services specialists
- Data centre infrastructure and digital technology professionals
- Industry bodies, peak organisations, and international partners
